

# ancona

## The allrounder

Its qualities are multisided. The ancona range is so perfected that it proved its value in any nursing and living situation.

It presents itself with its well-engineered technique modern and adjustable at the same time. The different colours and furnishing range makes the ancona to a real talent among the furniture concepts.

## ancona

### The allrounder

The clear design of the ancona healthcare bed is underlined by a hint of lightness. Its look does not reveal the bed's very high stability. This is just one of many advantages that are made possible by the sophisticated height-adjust technology. With its telescopic lifting column, ancona is ready to move in any position and also allows maximum space for the lifter below. Naturally, this top talent also offers a wealth of handy extras.

#### **And for heavier cases:**

adilec 220, model ancona for people up to 220 kg

adilec 280, model ancona for people up to 280 kg
